

Eric Tabacaru

Software Engineer | Agentic AI | Founder

Vlaardingen, Netherlands · erick.8bld@gmail.com · [+31 6 27463144](tel:+31627463144) · github.com/erick-dsnk · linkedin.com/in/eric-tabacaru

PROFILE

Computer Science student at TU Delft focused on agentic AI and full-stack product engineering. Shipped an MCP-based coordination layer for AI coding agents (Tetherlab, co-founder, open beta) and, at VeraConnect, a drag-and-drop website builder with agentic generation plus an autonomous marketing pipeline that ingests user data, reasons over it, and executes email campaigns to drive up client KPIs. Also founded Daredate, taking it from concept to 1,000+ waitlist users.

EDUCATION

TU Delft - BSc Computer Science and Engineering	2024 – Present
Liceul Teoretic "Ioan Petrus", Otopeni - Mathematics & Information Technology	2017 – 2024
Scoala Generala Nr. 179, Bucharest	2015 – 2017
South Fayette Primary School, PA, USA	2014 – 2015

EXPERIENCE

- VeraConnect - Software Engineering Intern** Rotterdam, NL · Jul 2025 – Sep 2025
- Built an agentic marketing pipeline that ingests user activity data, reasons over it, generates strategies to drive up client KPIs, and executes them autonomously (currently email marketing).
 - Owned the pipeline end-to-end inside VeraConnect's platform - data ingestion, the reasoning/strategy layer, and the execution integrations.
 - Used internally to drive up marketing KPIs - replacing manual campaign planning with a closed-loop agent system.
- VeraConnect - Software Engineer (Project Contract)** Rotterdam, NL · Apr 2025 – Jun 2025
- Scoped and built the first version of VeraConnect's drag-and-drop website builder from scratch, on a tight 10-week timeline.
 - Designed and implemented the agentic AI page-generation features that let users go from prompt to published site.
 - Wired up domain publishing and integrated the builder with VeraConnect's existing platform services before handoff to the engineering team.
- Tetherlab - Co-founder & Engineer** · tetherlab.io Remote · Apr 2025 – Present
- Co-founded an agent coordination startup alongside two cofounders; product is live in open beta with paying trial users.
 - Built core platform components: an MCP server that gives every AI coding agent a live view of what the others are planning, so they coordinate before writing code.
 - Wraps Claude Code, Cursor, Codex CLI, Gemini CLI, and OpenCode; replaces the usual "merge conflict" model with intent-level coordination.
 - Share product, engineering, and go-to-market ownership across the founding team.
- Daredate - Founder** · daredate.app Remote · Mar 2024 – Present
- Took a psychological-compatibility dating app from blank slate to live product; led branding, UI/UX, business strategy, and engineering.
 - Grew the waitlist to 1,000+ users before launch through organic content and community work.

PROJECTS

Daredate - Psychological-compatibility dating app	Mar 2024 – Present
• Concept-to-launch product. Owned UI/UX, branding, growth - 1,000+ waitlist signups. daredate.app	
Stock Predictor - ML price-movement classifier	Apr 2025 – May 2025
• Decision Tree classifier in Python with engineered features, preprocessing, and evaluation in Jupyter. github	
Rusty Engine - Browser engine in Rust	Sep 2020 – Jan 2021
• Bare-bones engine that parses and styles basic HTML and CSS. github	
Electric - Cross-platform package manager in Rust	Nov 2020 – Dec 2021
• Fast, cross-platform package manager for installing a variety of applications. github	
Tameris - Python Discord API library	Jan 2021 – Sep 2023
• Python library for building and controlling Discord bots. github	
GPT Code Assistant - Editor-integrated AI refactor tool	Jun 2023
• ChatGPT-powered assistant for refactoring and code suggestions inside the editor. github	

SKILLS

Languages: TypeScript, JavaScript, Python, Rust, SQL, HTML/CSS

Frameworks & Tools: React, Next.js, Node.js, Tailwind, Prisma, PostgreSQL, SQLite, Docker, Git, Linux

AI / Agentic: MCP servers, LLM orchestration, prompt engineering, Claude Code, Cursor, OpenCode, Hermes, ML fundamentals

Product: UI/UX, branding, technical writing, founder/GTM

LANGUAGES

Romanian - Native

English - Cambridge C2 (overall 205)

Spanish - Beginner

AWARDS

3rd Place - National Mathematics Olympiad, regional phase	2023
2nd Place - National Mathematics Olympiad, regional phase	2018
2nd Place - National English Olympiad, regional phase	2019
2nd Place - Mirunette National English Contest	2018, 2019
3rd Place - Fonix English Language Contest	2016

EXTRACURRICULAR & VOLUNTEERING

YES!Delft - 1-2 Startup Weekend Committee. Organized a workshop taking students from idea to launched startup. Oct 2024 – May 2025

EPAS LTIP - Junior Ambassador. Promoted EU values and democratic processes through school-level events (2020–2024).

EcoAssist Association - Green Endorsement reforestation volunteer, Arges and Ialomita counties. 2016, 2018

Vlogging Academy for Sustainability - one-week program on vlogging and social media for environmental awareness. Oct 2024
